**Fund Manager Commentary**

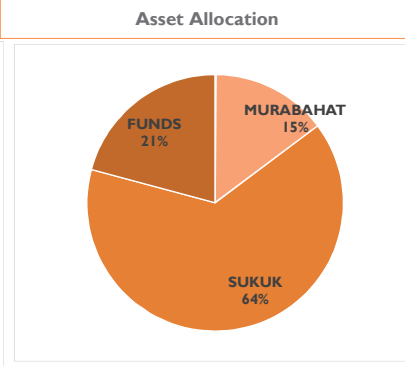

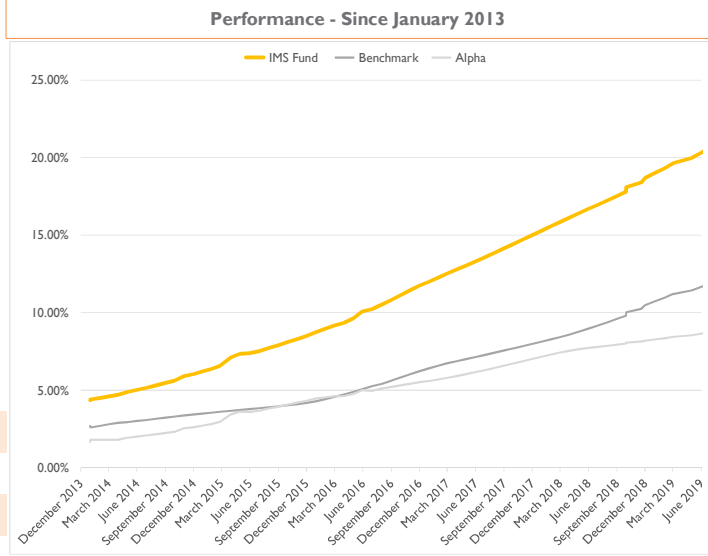

Itqan Murabahat and Sukuk Fund continued strongly to outperform its mandated benchmark during February 2019, achieving an annualized return of 3.34% during this period aggregating the total cumulative returns since the establishment of the Fund to 20.65% and the cumulative surplus of 8.76% against the market index during the same period.

Global fixed income markets posted a rise in sukuk prices during the second quarter of the year, as the American Federal Reserve held the interest rates steady, which led to an increase in the demand for US dollar denominated securities. All of which constituted a challenge for the Fund Manager to maintain the performance of the Fund during the future period.

Saudi Arabia's GDP is expected to witness growth as a result of diversification in its investment portfolio, the rise in the oil prices, and increase in government spending on development projects.

The fixed income markets in the region have been affected by many of the current political factors. In this context, the Fund Manager has been especially cautious in choosing sukuk and asset allocation in the Fund while continuing to invest in Murabaha with local and GCC banks to achieve strong performance during the second quarter.
