Fund Manager Commentary

Itqan Murabahat and Sukuk Fund continues to strongly outperform its mandated benchmark in the third quarter of 2022, achieving an annualized return of 3.09%, bringing the cumulative returns since the fund was established to 33.97% and the cumulative alpha rate to 16.26% during the same period.

Global fixed income markets faced challenges during the period under review, as the US Federal Reserve increased interest rate in an escalating effort to slow inflation that is running at its highest level in decades. All of which poses a challenge for the fund manager to

maintain the performance of the fund during the upcoming period.

The region's fixed income markets have been affected by the current economic affairs. In this context, the Fund Manager has been more cautious in the selection of Sukuk and asset allocation in the Fund while continuing to invest in high-yield sukuk and Murabaha with prestigious local and Gulf banks to achieve strong performance during the third quarter of the year.
